SUMMARY

Computer Science Engineering graduate (B.E. / B.Tech, 2026) with hands-on experience in full-stack software development and building end-to-end web applications. Proficient in Java, Python, JavaScript, TypeScript, React.js, Node.js, Express.js, REST APIs, and database technologies. Experienced in developing ERP and e-commerce applications with authentication, role-based access control (RBAC), database transactions, and interconnected business workflows. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks, with a focus on building scalable and reliable software solutions.

EXPERIENCE

Business Development Associate — Sixorbit ERP (Accrete Globus Technology) **Mar 2026 – Present**

- Conducted product demonstrations of Sixorbit ERP's CRM, inventory, stock management, and accounting modules for manufacturers, retailers, and distributors, translating software functionality into business requirements.
- Analyzed client requirements and workflows to understand software needs across CRM, inventory, accounting, and operational processes, communicating functional requirements to internal teams.
- Worked with ERP and CRM platforms to manage prospect information, track business workflows, document requirements, and maintain structured client records throughout the engagement lifecycle.
- Collaborated with cross-functional teams during client onboarding and implementation activities, helping align software workflows with customer business processes and supporting system adoption.
- Prepared performance and process reports using operational data to identify workflow trends, track process efficiency, and communicate actionable insights to stakeholders.

Software Development Intern — Edutainer (PAT Technologies Private Limited) **Feb 2026 – May 2026**

- Completed a 3-month software development internship focused on application development, programming, debugging, and problem-solving.
- Worked with React.js to develop and enhance frontend components, applying modern web development practices to real-world application tasks.
- Applied Python programming and logical problem-solving techniques while working on coding, debugging, and application development exercises.
- Gained practical exposure to software development workflows along with foundational concepts in cybersecurity, ethical hacking, and risk assessment.

PROJECTS

E-Commerce Platform — Full-Stack E-Commerce Application | Live | GitHub **August 2026**

React.js · Node.js · Express.js · MongoDB · REST APIs

- Built a full-stack e-commerce platform with end-to-end user, product, cart, inventory, and order workflows, integrating React-based frontend components with RESTful backend APIs.
- Implemented secure authentication and role-based authorization to separate customer and administrative operations.
- Designed product, inventory, and order workflows to maintain structured data flow across multiple interconnected business operations.

ERP System — Enterprise Resource Planning Application | Live | GitHub **August 2026**

React.js · Node.js · Express.js · MongoDB · REST APIs

- Developed a centralized ERP platform integrating quotations, inventory, orders, and operational workflows into a single application.
- Designed role-based workflows across multiple business functions, improving visibility and coordination of interconnected processes.
- Structured the application around end-to-end process flows, reducing reliance on disconnected manual tracking systems.

EDUCATION

B.Tech in Computer Science & Engineering **2022 – 2026**

Sapthagiri College of Engineering, Bengaluru **CGPA: 8.6 / 10**

TECHNICAL SKILLS

Languages:	Java, JavaScript, TypeScript, Python, SQL
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, React Router, Responsive Design
Backend:	Node.js, Express.js, REST APIs, MVC Architecture
Database:	MongoDB, PostgreSQL, SQLite, Prisma ORM, Database Schema Design
Authentication & Security:	JWT Authentication, Role-Based Access Control (RBAC), HTTP-only Cookies, Bcrypt
Development:	CRUD Operations, API Development, Database Transactions, Debugging, Problem Solving
Tools:	Git, GitHub, Vite, Vercel, Netlify

ACHIEVEMENTS & CERTIFICATIONS

Certifications: CyberOps Associate · Introduction to Modern AI · Apply AI: Analyze Customer Reviews · JavaScript · HTML5 – The Language · CSS3 · Networking and Web Technology
